Top management ensures that the Quality Policy is communicated to all employees. It is included in new employee training and training on the QMS. It is posted in prominent places throughout the facility to maintain high standards within our organization.

The Quality Policy is reviewed annually via the Management Review process to evaluate the policy's continuing suitability for the company. ASC's Quality Policy is as follows:

Quality Policy

Through a culture based on teamwork, American Standard Circuits will strive to provide printed circuit board products and solutions that comply with requirements by continuously improving the effectiveness of the quality management system and focusing on customer satisfaction.

To facilitate employee understanding and comprehension of the Quality Policy, it may be simplified to the following abbreviated statement:

Abbreviated Quality Policy

Quality and Customer Satisfaction is our #1 Priority

Note: If desired, the above statements may be used on marketing materials or internal signage in an uncontrolled manner. In other words, any associated brochure, web site, signs, posters, badges, etc. do not have to be updated in the event one of the statements is changed, nor do they need to include the associated document control numbers when published.
